

International Public Notice:

January 5, 2025

The United States of America – Federation of States International Public Notice: Important Announcements

The American Military is being reorganized as a true national military under the control of the actual civilian government of this country. Our sons and daughters will no longer be used as unknowing mercenaries in wars for profit. Instead of being deployed to ransack other nations under false presumptions, they will be deployed to attack and fight the actual enemies of humanity instead.

We are invoking the law of the land and soil and our ownership interest as living people and purported donors of all the public and private trusts.

Toward that end, we have chartered The Global Family International Trade Bank and established The American Federation Treasury; in concert with the bank, we have also established our American Federation Sovereign Treasury Account, which is open for business.

We have also established our Paymaster Account, so that we can pay Federal workers who are eligible for rehire, including members of the military. We have also established our Federation Reserve and Trust and Underwriting Accounts for the purpose of conducting our affairs in the realms of international and global business.

We have similarly established The Global Family Commercial Bank and The Global Family Bank of Commerce, and a similar roster of functional accounts to expedite and organize the conduct of business in the global forums of commerce and maritime commerce respectively.

These banks have all been created for the use and benefit of the living people and their sovereign governments and instrumentalities.

Each nation is encouraged to form its own sovereign international bank and join our bilateral bank network. Our Bank Treaties are transparent and public.

We have also created new institutions, Prosperity Unions, for the purpose of distributing prepaid credit which is owed to the living people worldwide.

International Public Notice:

January 5, 2025

The United States of America – Federation of States International Public Notice: Important Announcements

This Bilateral Bank System uses simple carriage accounting and transparent blockchain algorithms to transfer assets and credit; simple as it is, it is nonetheless state-of-the-art and provides all the necessary and traditional banking services that people and businesses need---plus a few services that are brand new, never been done before.

This process of fleshing out the financial and economic capability of our national and international government functions have been necessitated by the long-term fraud that has been practiced against us and other national governments by criminal foreign interests. By making the Bilateral Bank System available to all the other living people and countries of the world, we are opening opportunities and relationships that have long been illegal and immorally monopolized and coercively controlled.

We have also established our new gold-backed currency, the American Federation Dollar, which has been issued as an e-currency and denominated as a gold-backed Harmony Coin and will be issued as a gold-asset-backed certificate (cash) as well.

We are positioned on and have our own harmonized exchange platform, so we have everything we need.

Our bilateral system offers a third and profoundly different option for non-political, simple, old-fashioned banking services that are not controlled by nor allied with political cults nor incorporated surveillance states.

The next steps will see the release of restitution payments and personal account transfer capability to transact everyday purchases anywhere in the world.

This system is transparent and focused on returning economic and financial power to over eight billion people, returning hard assets and credit that belongs to them, and bringing a halt to the arbitrary and coercive monopolization of the banking industry.

People ask -- why should we trust you? We know how bad Swift is. We can guess how bad BRICS is. Why would your bilateral bank system be any different?

International Public Notice:

January 5, 2025

The United States of America – Federation of States International Public Notice: Important Announcements

It's different because it was created for living people and sovereign nations, meant to serve them in the correct jurisdictions, under the correct laws and limitations.

You want privacy? You want security? You want an end to bail-ins, bail-outs, "depository claims" converting your deposits into bank property, night windows, arbitrary unproven levies, politically motivated seizures, inflation, deflation, blocked transactions, asset seizures, surveillance of your buying habits, and everything else? Use your feet and move your money.

When we investigated, we found that virtually all banking worldwide is being conducted in one foreign jurisdiction of the law --- maritime commerce --- a jurisdiction that doesn't make sense for 90% of living people, as we are not engaged in maritime business and not knowingly acting as "individual" incorporated business enterprises--that is, franchises. This circumstance derives directly from the Great Fraud and the various legalistic tricks--- undisclosed registrations, unconscionable contracts converting the political status of babies, unlawful conversion of living people into foreign corporate and incorporated persons, human trafficking, fraud, personage, and barratry --- all served to redefine people as things, and as incorporated things, they were then "eligible" to participate in commerce.

And what better form of commerce, from the British point of view, than maritime commerce, which they controlled? And which was subject to Scotland's version of Roman Civil Law? It was not a mistake that millions of Americans, Brits, Germans, French, Italian and even people as far away as Indonesia and Japan and China were redefined in this same exact way and herded like so many animals into a foreign banking system under the control of a foreign and undisclosed law and foreign undisclosed hierarchy.

The victims, unaware of what was going on behind their backs, couldn't possibly know that they were facing a foreign form of law and a whole roster of False Legal Presumptions the moment they stepped foot in a courtroom, much less could they identify precisely what form of law confronted them.

International Public Notice:

The United States of America – Federation of States International Public Notice: Important Announcements

Nobody hung out a sign that said: Scottish Maritime Commercial Law (Roman Civil Law Annotated) practiced here. Oh, and your identity has been stolen and you've been redefined, for the purposes of the court, as a commercial corporation franchise engaged in maritime commerce....

No, nobody said that, and no symbols or signs revealed it; only the practice itself eventually disclosed the purgatorial nature of the "justice" being offered.

So, ask yourselves --- do you want to transact your business affairs as a commercial corporation engaged in maritime commerce, subject to a Scottish version of Roman Civil Law?

Or do you want to conduct your business affairs (and banking) as a living Man, subject to the laws of living Men, as set down by your own people in your own country and administered by your own courts?

Seems like a simple enough choice to us.

Our Bilateral Banking System allows you to do exactly that, as each country has their own International Bank and their own Sovereign Treasury Account linked to National (Soil Jurisdiction) Banks. Each country and sovereign nation is enabled to provide both the banking services and the correct form of law and currency owed to the living people.

No more British meddling and deceit and white-collar pillaging, no more personage or barratry, no endless unraveling of secret "government" codes and undeclared foreign agents. None of it.

Our banking system is established under the Public Law of The United States of America, our unincorporated Federation of States, a simple and honorable law that upholds the rights of individual people, including their property rights.

International Public Notice:

January 5, 2025

The United States of America – Federation of States International Public Notice: Important Announcements

Each country has a similar law, the Law of the Land, that is part of their history. If you are sick of the meddling, deceit, injustice, immorality, fraud, insecurity, coercion and theft that this corrupt system of both banking and law promotes and perpetuates,

it's time to move your money, but until now you have had very few options to do that. QFS or BRICS, BRICS or QFS...frying pan, fire, fire, frying pan.

All these systems promoted by corporations masquerading as governments have the same Achilles Heel-- they are all politicized, self-interested, and, for their own convenience, promoting a dehumanized surveillance state.

They propose to go on with "improved" business as usual, using the same oppressive and inappropriate forms of law, the same unlawful conversion of people into things-- corporate franchises-- the same predatory abuses.

We are here to fix the actual problems --- criminality and ignorance.

Introducing the gold-backed American Federation Dollar, and our Bilateral Banking System for people and small unincorporated businesses, our love-o-nomics vision, which seeks to empower individual people and communities worldwide, enabling them to possess their own assets and build their own dreams within a secure framework of international law designed to protect the living people and their assets from corporate predators.

This is a Cause that we all have a vital interest in. Every living man and woman has a stake in the outcome.
